DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 14 and 25 are rejected under 35 U.S.C. 102(a) as being anticipated by Dean et al. P.N. 6,445,182 (Dean).

Dean discloses a method and system for phase unwrapping a 3D Magnetic Resonance image. Applicant's attention is directed to Fig.4 and corresponding description. As shown in the Figure, a phase unwrapped image as that displayed at 214 is obtained by use of phase unwrap component 208. The MRI system uses all the conventional components depicted in Fig. 3. That is, gradient coils 134, RF coils 156 and control circuit 142 and 110. Dean meets all the limitations of the claims at issue.

Inventorship

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2859

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Allowable Subject Matter

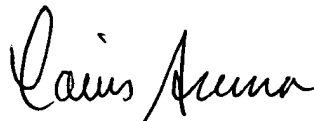

4. Claims 1-13 and 36-44 are allowed.
5. Claims 15-24 and 26-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patch and Bernstein et al. disclose methods for phase unwrapping of MR images. Note the abstract of each disclosure.
